PROJECTS

CAR HELP WEB PORTAL USING JAVA EE
- Car help web portal can centrally manage all your vehicles from a pool of vehicle data and make them available to you and your dealers. These powerful systems help operators increase sales, save time and money, streamline operations, and enhance the guest experience.

STOCK MANAGEMENT SYSTEM USING JAVA SE
- Stock management is the software that are helping to manage ordering, storing, tracking, and controlling inventory.
- Increasing the quality level of customer service, reducing lost sales due to lack of product and generating greater loyalty to your company
