## CONFERENCES AND SEMINARS

---

[ 25 Feb 2024 – 27 Feb 2024 ] Tashkent

**Model United Nations Name of the country:** Germany

**Name of the committee:** UNESCO

**Topic:** Country's involvement about the nuclear crisis in the Korean peninsula

### Introduction:

The nuclear crisis in the Korean Peninsula poses a significant threat to regional and global security, with the potential for catastrophic consequences if not effectively addressed. Germany's involvement in efforts to address this crisis is crucial, as a key player in international diplomacy and nuclear non-proliferation efforts. This position paper will analyze Germany's role in the nuclear crisis in the Korean Peninsula and provide recommendations for future actions.

### Position:

Germany has a long-standing commitment to nuclear non-proliferation and disarmament, as evidenced by its participation in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) and its support for multilateral efforts to address nuclear threats. In the context of the nuclear crisis in the Korean Peninsula, Germany has a responsibility to actively engage in diplomatic efforts to de-escalate tensions and prevent the proliferation of nuclear weapons. Germany should work closely with other key stakeholders, including the United States, China, Russia, and South Korea, to pursue diplomatic solutions to the nuclear crisis in the Korean Peninsula. This includes supporting dialogue between North Korea and the international community, as well as implementing sanctions and other measures to pressure North Korea to abandon its nuclear weapons program.

Furthermore, Germany should leverage its expertise in nuclear technology and disarmament to provide technical assistance and expertise in verifying North Korea's compliance with any agreements reached in the context of negotiations. Germany's experience in nuclear disarmament, as well as its strong commitment to international law and human rights, make it a valuable partner in efforts to address the nuclear crisis in the Korean Peninsula.

In conclusion, Germany must continue to play a proactive and constructive role in addressing the nuclear crisis in the Korean Peninsula. By working with other key stakeholders and leveraging its expertise in nuclear non-proliferation, Germany can contribute to efforts to de-escalate tensions, prevent the spread of nuclear weapons, and promote peace and security in the region.

## MANAGEMENT AND LEADERSHIP SKILLS

---

### The Youth Union **RECOMMENDATION**

Mohammad Shafique was admitted to the MBBS faculty of the Samarkand State Medical Institute in the 2019/2020 academic year. During his studies, Mohammad Shafique has mastered all subjects with "excellent" grades, showing his discipline, thirst for knowledge, responsible approach to assigned tasks, and the ability to solve problems independently. Active **member of the Youth Union**. I think his thoughts and opinions about the service industry are commendable. Mohammad Shafique is constantly working on himself and conducting effective scientific research. If we talk about his personal qualities, the right word is that he appears as a representative of youth loyal to his country.
