PROJECTS

IMOVIES APPLICATION

Description:
Created a iMovies Application with JavaScript, HTML, CSS, and React JS, Redux. Added features, improved user experience, and built a dynamic user interface.

Rolls and Responsibilities:
- Created responsive user interfaces with JavaScript, HTML, and CSS.
- Redux and React JS were used to create interactive features and effectively manage state.
- Used the TMDB API to smoothly use other resources to retrieve and display movie data.
- Helped with testing and debugging to guarantee the application's performance and dependability.
- iMovies Application deployed on Netlify Server.

Technologies Used:
Structure and Style
HTML, CSS
Language
JavaScript
Library
React JS, Redux
API
TMDB API

LANGUAGES

Hindi, English
