OBJECTIVE

A passionate front-end engineer, learned technical expertise from the School of Accelerated Learning. My strong dedication to transforming imagination into reality defines my journey. Love to create user-friendly digital experiences, pushing the boundaries of how people interact with technology. My career goal is always to create awesome websites and apps, face challenges enthusiastically, and contribute meaningfully to the ever-changing world of web development.

PROJECTS

Matka King – Betting Results Website

- Made a betting results platform that provided an interface for the winning numbers.
- Spearheaded the design and smooth implementation of the entire frontend architecture.

Technologies: HTML, CSS

Visit at: www.matka-king.net

Connect Work Hub – Mobile App

- Fostered collaborations by connecting customers with nearby daily workers and vice versa.
- Implemented navigation, integrated backend, ensure secure login/signup, used Native Base, and integrated Redux Toolkit for efficient state management.

Technologies: React Native, Redux Toolkit, Native Base, CSS

Visit at: [Github/connect-work-hub](https://github.com/connect-work-hub)

Imgur

- Clone of Imgur, online image hosting and sharing platform.
- Implemented router functionality, navigation bar, sign-in and sign-up page.

Technologies: React.js, CSS

Visit at: [Github/Imgur](https://github.com/Imgur)

EXPERIENCE

[June 2021 – Aug 2022]

[Shift in charge] • [Svaar process solution pvt ltd.].
