Objective

"To leverage my creative design skills and user-centric approach to craft intuitive and visually compelling user experience that drive engagement and satisfaction for clients and end-users"

Projects worked on

School of Accelerated Learning

Senior Pulse

(24 Hours, Solo Project)

"Senior Pulse" is a health and wellness app meticulously crafted to empower seniors with intuitive features aimed at enhancing their overall well-being and promoting a healthier lifestyle."

Tour-G (Travel Booking App)

(1 Week, Team Project)

"A versatile travel app "Tour-G" offering travelers a personalized, hassle-free journey with features for itinerary planning, real-time recommendations, and memorable experiences worldwide."

Google Drive Web Redesign

(4 Week, Team Project)

"We identified missing features on Google Drive, like theme customization, TravelWise AI, access control, and security issues. My role focuses on website redesign through a UI/UX approach, based on research findings."

Pinterest App Redesign

(4 Week, Team Project)

"Our goal is to grasp the UX process, empathize with users, identify pain points, and enhance user retention and engagement in the Pinterest app through redesign. I contributed by conducting research and creating new screens with UX tools and UI principles."

Few other solo projects like **X**(Formerly known as twitter), **Rail Roadies** (Public transport app), **Smart Ease** (Smart Home app) and **Notion** (Web Redesign).
