

# HIMANSHU NALIN

## JAVA DEVELOPER

### CONTACT

 **Phone**  
8603917431

 **Email**  
nalinhimanshu60@gmail.com

 **Address**  
Noida, INDIA

### EDUCATION

- ◆ Netaji Subhash Engineering College Bachelor of Technology
- ◆ D.A.V Public School  
CBSE Board with 60.80%
- ◆ R.L.S.Y ANISABAD  
BIHAR Board with 70.50%

### LANGUAGES

- ◆ English
- ◆ Hindi
- ◆ Bengali

### ABOUT ME

Java software developer with 3.1 years specializing in Core java, Spring Boot, Microservices, RESTful web services, and Hibernate JPA. Passionate about clean code, continuous learning, and delivering scalable solutions. Effective collaborator in cross-functional teams and seeking to secure a challenging position as a Software Developer.

### TECHNICAL SKILLS

**Programming Language** : Core Java

**Frame Works** : Hibernate JPA , Spring Boot, Spring Security, Spring MVC

**Distributed technologies** : Restful Web services and Microservice

**Databases** : MySQL Database

**Tools** : Eclipse, STS, Postman, IntelliJ, Git, Maven

**Application Servers** : Apache Tomcat 9.x/10.x

**Domains** : Travel

**Knowledge of:** AWS(Amazon web service) , Git and GitHub, Debugging

### WORK EXPERIENCE

#### IGT Solutions

PROJECT- Flight Reservation Application (FLY-X)

*Team size-7*

The Flight Reservation Application project aims to simplify the complexities of flight reservations through a modern web platform. Leveraging Spring Boot and RESTful API technologies, the system facilitates efficient management of flights and streamlines reservation-related operations

- ◆ Understood project requirements .
- ◆ Design, develop, implement, and maintain java application
- ◆ Implementing MVC architecture while developing the code
- ◆ Setting up MySQL database and creating database Schema
- ◆ Developed repositories, services, controllers in Spring boot.
- ◆ Worked alongside other developers to implement RESTful APIs in Java and Spring Boot with microservices .
- ◆ Tested and Documented Rest Apls using Postman
- ◆ Exposing / consuming restful Webservices
- ◆ Implemented JWT Security with Auth.
- ◆ Fixing of defects communicated by testing team
- ◆ Delivered solution according to sprint plan.
- ◆ Coordinating with other teams working on the same

## PROFESSIONAL SKILLS

---

- ♦ Use Java/J2EE technologies like core java, JDBC, Servlet, Jsp, spring IOC, Spring MVC, Hibernate with JPA, Restful web services and Microservices to develop web applications and add functionalities to existing applications.
- ♦ Implemented java 8 new features to develop the application.
- ♦ Developed highly interactive and customized UIs using JavaScript, HTML and CSS to improve functionality of web applications.
- ♦ Having knowledge on Core Java topics of Collections and Exception Handling and Multithreading.
- ♦ Having good experience in API development & testing using Restful webservices .
- ♦ Play a pivotal role as a part of an agile scrum team, developing new Apls and Deployment on cloud with AWS.
- ♦ Experience in testing and Documenting Rest Apis using Postman
- ♦ Expertise working on Application servers like Tomcat 9.x/10.x.
- ♦ Experience in implementing security in spring boot using JWT Token &Auth.
- ♦ Knowledge of Amazon web service(AWS).
- ♦ Having good experience JIRA tool for project management and maintaining Software development life cycle(SDLC).
- ♦ Experience in using and implementing design pattern.
- ♦ Adaptive to new technologies, Easy to work with any Environment and hard working nature.

## PERSONAL QUALITIES

---

- ♦ Ability to successfully work under tight project deadlines
- ♦ Passion for software development
- ♦ Flexible, creative and pragmatic team player
