CAREER SUMMARY:

Enthusiastic engineering graduate with basic knowledge in coding and design. Dedicated Front End Developer with a passion for crafting immersive digital experiences. As a fresh Front-End Developer, proficient in HTML, CSS, and JavaScript, I bring a strong foundation in web development to drive engaging user experiences. Skilled in responsive design and cross-browser compatibility, I collaborate effectively with design and back-end teams to deliver visually stunning and functional websites. Eager to learn and adapt, I stay updated with the latest technologies and frameworks, such as React.js or Node.js.

SKILLS AND STRENGTHS:

- Front-end: Html 5, CSS 3, Bootstrap, JavaScript, React.js, Redux
- Back-end: MySQL, Python, Node.js
- Database: MySQL
- Soft skills: Team player, Delivery results

PROJECTS:

Parallax website: Html 5, CSS 3

- A parallax website includes fixed images in the background that are kept in place and the user can scroll down the page to see different parts of the image.
 - For each Html section, given a class so that it can be targeted in the CSS.
 - In the Html page, I also divisions and in each division, there is a header and a small paragraph.
 - In the CSS file, decorated the text and placed the head in a fixed position.

To-do list: Html 5, CSS 3, JavaScript

- A Todo Lists are the lists that we generally use to maintain our day-to-day tasks or list of everything that we have to do, with the most important tasks at the top of the list, and the least important tasks at the bottom.
 - Sets up event listeners for form submission and item clicks. Handles adding and editing items in the list.
 - Displays success messages for add and edit operations.
 - Enables button based on provided reference and button ID. Interactive list for adding, editing, and deleting items.

Calculator: Html 5, CSS 3, JavaScript

- Is used for performing basic mathematical operations like Addition, subtraction, multiplication, and division. HTML and CSS is used to design and style the basic structure of the calculator.
 - With every click of the button, it displays the respective value of the button to the input field by using the function *dis()*.
 - *myFunction()* is used to set the value pressed from the keyboard to the same input field.

PERSONAL ACHIEVEMENTS:

- Post Graduate diploma in computer application From Softzone
- Full stack developer with Databases from Croma campus
